Software Developer | Full-Stack Developer

Computer Science Honours graduate with experience building full-stack web applications, REST APIs, analytics dashboards, and real-time systems using modern frontend, backend, and database technologies.

Education

University of Manitoba — Winnipeg, MB

Bachelor of Science (Honours), Computer Science

Graduated: April 2026

GPA: 3.57 / 4.5

Skills

Languages: Java, Python, C/C++, JavaScript, TypeScript, SQL, Kotlin, HTML, CSS

Software Development: Object-Oriented Programming, Data Structures & Algorithms, REST APIs, Debugging, Unit Testing, Integration Testing, Performance Optimization

Frameworks & Libraries: React, Node.js, Express, Django, Spring Boot, Flutter, Jetpack Compose

Tools & Platforms: Git, GitHub, Docker, AWS, Android Studio, Visual Studio, Eclipse, WordPress

Spoken Languages: Fluent in English, Hausa and Basic Arabic

Projects

Aqua Essence, Real Client Project

- **Engineered** a constraint-based matching system combining **FastAPI (Python)** and **C++17**, assigning **~1,800 swimmers per week** to instructors under real-world constraints
- **Built** a C++ desktop **host/server** for an offline matching system, exposing **20+ local HTTP/JSON endpoints** to power a browser-based UI

Galaxy, Full Stack Space Exploration Platform [<https://nabxz.github.io/portfolio-website/Portfolio-PROJECTS/Galaxy/>]

- Developed a full stack web app using real-time APIs (NASA, Pixabay) for live space and Earth data.
- Delivered **real-time data updates (<2s latency)** for space and Earth data
- Implemented **secure authentication (Bcrypt, express-session)**

HoopShop, Full Stack E-commerce Platform [<https://nabxz.github.io/portfolio-website/Portfolio-PROJECTS/HoopShop/>]

- **Built** mobile-first **e-commerce platform** with secure user authentication, product filtering, and real-time search.
- **Reduced page load time by 35%** using **AJAX and async data fetching**
- Implemented **debounced search, filtering, and dynamic carousels**

Work Experience

Teaching Assistant – Grader/Marker

University of Manitoba – Winnipeg, MB

Sept 2024 – Apr 2026

- **Evaluated and graded** programming assignments for **30+ students/term**, providing detailed feedback.
- **Led** consultation sessions to explain **core computer science concepts and projects**.

Software Engineering Intern

Paystack – Nigeria

Aug 2020 – Dec 2021

- **Built** an internal **analytics dashboard (React, Node.js)** to visualize engineering performance metrics, increasing team visibility.
- **Refactored** legacy **Python modules**, improving efficiency by **20%** and enhancing maintainability.
- **Automated** testing with **Jest and Mocha**, reducing manual QA time by **30%**.

Awards: International Undergraduate Student Scholarship, Dean's Honor List (multiple terms)

Tech Involvement: UMSATS (2024–Present), devClub (2024–Present), CSSA (2023–Present)

Relevant Coursework: Data Structures & Algorithms, Software Engineering, Databases, Parallel Programming (MPI)
